PROFILE

Front-End Developer with practical experience in building interactive, high-performance web applications. Specializing in modern UI/UX trends, dark mode aesthetics, and immersive 3D web animations. Experienced in creating responsive, accessible, and maintainable codebases with a strong focus on clean UI. Skilled in integrating AI Agents into web systems to automate business operations and enhance efficiency. Actively seeking remote or full-time opportunities to deliver innovative, user-centric web experiences.

EDUCATION

Bachelor of Computer Science at Arab Open University (AOU), El Shorouk, Egypt

- Studying core computer science methodologies, software engineering principles, algorithms, and OOP. September 2023 - September 2027
- Successfully balanced rigorous academic coursework while independently mastering modern front-end technologies and developing production-ready applications.

EXPERIENCE

Freelance Front-End Developer at Self-Employed (Freelance), Remote / Menoufia, Egypt

- Developed and enhanced 10+ responsive, high-performance front-end interfaces using React.js, Tailwind CSS, and Bootstrap, improving cross-device loading speeds by 25%. May 2025 - May 2026
- Integrated robust full-stack workflows, connecting React frontends with PHP Laravel backends, relational databases, and custom AI Agents to automate business logic.
- Implemented cutting-edge visual experiences, leveraging modern animation libraries like Three.js and Swiper.js to deliver immersive interactive web designs.
- Maintained clean, scalable, and reusable codebases using Git and GitHub for version control, focusing heavily on web performance optimization and accessibility.

SKILLS

Core Technologies: HTML5, CSS3, JavaScript (ES6+), React.js

Styling & Frameworks: Tailwind CSS, Bootstrap, Responsive Web Design

3D & Animations: Three.js, Spline.js, Swiper.js, WOW.js, GSAP

Version Control & Tools: Git, GitHub

Best Practices: Clean UI, Web Performance Optimization, Accessibility, Maintainable Code, Local Storage Integration, AI Agent Integration

PROJECTS

HORAS Factory Management System (ERP)

- Engineered interactive analytical dashboards providing real-time visibility into profit and loss, improving financial tracking efficiency by 40%. December 2025 - February 2026
- Led the frontend technical integration of the brand identity, executing precise icon placements for the finalized "HORAS" logo across all modules.
- Designed a responsive, user-friendly interface tailored for complex data entry, reducing operational confusion for staff by 35%.
- Architected a comprehensive AI Agent integration utilizing React for the frontend and PHP Laravel for the backend to automate workflows and prevent operational overlaps.

PlayStation (PS) Management System

- Developed a comprehensive management interface tailored for gaming centers to monitor daily operations, track inventory, and manage active sessions. March 2026 - April 2026
- Integrated an AI Agent to automate core business logic, handling 100+ customer reservations weekly and automatically generating billing invoices.
- Designed an intuitive, high-performance user interface (UI) that simplified administrative tasks, significantly improving operational efficiency by 30%.

Interactive E-Commerce Platform (HORAS Online Shop)

- Engineered a fully functional e-commerce frontend architecture utilizing JavaScript and Local Storage to seamlessly manage product catalogs and preserve shopping cart state without a backend. May 2026 - May 2026
- Implemented modern UI/UX design trends, incorporating high-contrast themes and engaging interactive elements to boost user retention by 20%.
- Resolved complex layout rendering issues by engineering precise CSS Flexbox alignment solutions to fix shopping cart item behaviors, ensuring elements aligned perfectly to the top of the container.
- Streamlined the platform for responsiveness and performance, adapting perfectly across all mobile and desktop devices with a 95+ Lighthouse performance score.

LANGUAGES

Arabic: Native

English: Conversational

CERTIFICATES

Front-end Web Development Diploma (React JS) from SEF Academy

Successfully completed an intensive 5-month frontend development diploma (score 98.28%). Covered advanced React JS applications.

April 2026

JavaScript, React JS, and HTML Web Development from Cursa

Completed a comprehensive 15-hour specialized track focused on modern front-end technologies.

November 2025

Introduction to Front End Development from Simplilearn SkillUP

Completed a multi-course specialized track including JavaScript, React JS for Beginners.

November 2025

Sprints x Microsoft Summer Camp - Web Development from Sprints x Microsoft

Successfully completed 40 hours of intensive technical training in web development.

September 2025
